Is Your Journal "Up Front" with Your Address? Or, the Saga of the Incomplete Address. Part 2

Number 43

October 24, 1983

Last week, I discussed the numerous editorial practices that make it difficult for ISI® to accurately index the author addresses contained in journal articles.¹ Since millions of reprint requests per year are based on these author addresses, it is crucial that our information be as accurate and as timely as possible. Editorial policies that compel us to "dig up" and painstakingly verify information that should have been readily available cause our readers to suffer—both in terms of the cost of our services and their lack of timeliness.

This is a message we have repeated in numerous discussions for almost 20 years. Although ISI regularly brings its complaints and suggestions to the attention of journal editors, contrary to the widespread notion, we alone cannot accomplish these changes. Peer pressure, however, may induce even the most lethargic editor to budge. As a regular contributor to a journal, you can accomplish more than we can. So last week, we published a list of offending journals in the social and behavioral sciences and in the arts and humanities. We asked *Current Contents*® (CC®) readers to write to

the publishers of any listed journal to which they contribute.

This week, we are publishing a list of journals in the life sciences; agriculture, biology, and environmental sciences; clinical practice; engineering, technology, and applied sciences; and physical and chemical sciences. The titles of the journals are listed in Table 1. Their publishers are listed in Table 2. Figures 1-3 illustrate some typical problems. Once more, we caution that the list is not comprehensive. And in fairness to some of the editors whose journals appear in Table 1, it should be kept in mind that a few may have responded to ISI's suggestions between the time this essay was prepared and the time it was published. It may not be self-evident, but the five sections into which the table is divided correspond to the five CC editions covering each of these categories.

* * * * *

My thanks to Stephen A. Bonaduce and Bella Teperov for their help in the preparation of this essay.
